

# IMPORTANT NOTICE REGARDING TREE TRIMMING 2021

PUC will have 17 Trees trimming the trees around all power lines (to a minimum of a 3m distance) in the area depicted below.

PUC trims trees each year in order to prevent tree branches from coming into contact with power lines. By law, all Ontario electrical utility companies must maintain a certain distance between utility power lines and trees.

A tree touching a power line could cause a power outage, fire or electrocution.

## TREE SAFETY:

- Do not climb a tree near overhead lines
- Call PUC before trimming or cutting down a tree near a power line
- Stay clear of trees that are in contact with power lines

**CALL ONTARIO ONE CALL BEFORE YOU DIG:  
1-800-400-2255**
