

Ontario's System-Wide Electricity Supply Mix: 2019 Data

PUC Distribution Inc. is obligated, as a distributor of electricity, to supply electricity to every person connected to our distribution system (The Electricity Act 1998). As a provider of Standard Supply Service, we are required to disclose the system-wide Electricity Supply Mix.

Under O. Reg. 416/99 the Ministry of Energy is responsible for providing Ontario's electricity supply mix data for electricity suppliers. The pie chart and table below shows the system-wide electricity supply mix data for 2018. This data must be used by electricity suppliers for the purposes of complying with the disclosure obligations of O. Reg. 416/99 and the Directive. This data should be considered current until further notice.

Electricity Sources	Ontario's Electricity Mix*
Nuclear Energy	58.2%
Water Power	24.0%
Natural Gas*	6.1%
Wind	8.2%
Solar PV	2.4%
Bioenergy**	0.5%
Non Contracted***	0.6%

* Includes Lennox, dual fuel (ng/bio) consistent with IESO.
 ** IESO's embedded generation data set merges biomass and gas.
 *** Non-Contracted represents a variety of fuel types that the IESO is unable to categorize due to a lack of information from Local Distribution Companies (LDCs).
 Note: Figures may not add to 100% due to rounding.
