

Ontario’s System-Wide Electricity Supply Mix: 2021 Data

PUC Distribution Inc. is obligated, as a distributor of electricity, to supply electricity to every person connected to our distribution system (The Electricity Act 1998). As a provider of Standard Supply Service, we are required to disclose the system-wide Electricity Supply Mix.

Under O. Reg. 416/99 the Ministry of Energy is responsible for providing Ontario’s electricity supply mix data for electricity suppliers. The pie chart and table below shows the system-wide electricity supply mix data for 2021. This data must be used by electricity suppliers for the purposes of complying with the disclosure obligations of O. Reg. 416/99 and the Directive. This data should be considered current until further notice.

Electricity Sources	Ontario’s Electricity Mix*
Nuclear Energy	55.3%
Water Power	23.3%
Natural Gas*	8.1%
Wind	9.0%
Solar PV	2.5%
Bioenergy**	0.5%
Non Contracted***	1.2%
* Includes Lennox, dual fuel (ng/bio) consistent with IESO. ** IESO’s embedded generation data set merges biomass and gas. *** Non-Contracted represents a variety of fuel types that the IESO is unable to categorize due to a lack of information from Local Distribution Companies (LDCs). Note: Figures may not add to 100% due to rounding.
